

[Elements of a Data Management Plan: Organization and Standards](#) [1]

Submitted by administrator on Tue, 2013-03-05 15:33 **Overview:**

The purpose of this module is to introduce you to the range of topics related to data organization and standards that may be important for you to address in your data management plan. We say may be important because just as every research project is different, so every data management plan needs to be different to accommodate the particular needs of that project. This means that some topics on data organization and standards will be more important to think about and describe in your data management plan than others. Which topics are more important will depend on the size, scale, complexity and other details of your project that differentiate what you are doing from what others are doing. So... no, unfortunately, there isn't a one-size-fits all data management plan!

DOI /EZid : doi:10.7269/P3DZ0672

Target Audience: Research Scientist

Educational Purpose: Online course

Time Required : P11m47s

Learning Mode: Expositive

Learning Resource Type: Online exercise

Language of Learning Resource: en-us

Publication Date: February 2013

Publisher: Federation of Earth Science Information Partners

Contributor: Video performed by Nancy J. Hoebelheinrich

Editor: Ruth E. Duerr

Nancy J. h

Version: 1.0

Keywords: [data management](#) [10]
