Submitted by Krbm on Mon, 2013-12-16 12:37 Wednesday, December 18, 2013 - 12:00 to 13:00

**Event:** [Telecon Minutes](#) [2]

**Session Type:** [Other](#) [3]

**Media/Video:** [Meeting Recording \(Streaming\)](#) [4]

[Meeting Recording \(Download\)](#) [5]

**Collaboration Area:** [Documentation](#) [6]

**Abstract/Agenda:**

1. Winter meeting topics
2. AGSU feedback/insights

**Notes:**

1) Winter 2014 meeting

- Metadata Augmentations (Habermann) is scheduled for Wednesday 2pm to 3:30 (New Hampshire Rm)

- Documentation (Armstrong) (name is actual Granule Discovery and Services) - is scheduled for Wednesday 4 - 5:30 (New Hampshire Rm)

- Ed has 3 talks lined up

1. NOAA - NODC

2. NASA - Godard (?Chris Linus)

3. NASA - JPL (Ed or other)

- Walt might also add a talk about granule aggregation

- That would mean 4 - 20 min talks

- Need to add session to discuss the strategic plan

- Want to add this on Friday after lunch (1:30 - 3pm)

- Several other talks relevant/related to Documentation Cluster - Ted is going to talk to the organizers of these sessions

2) AGSU update/feedback

- Mike - what should organization pay attention to for the future?

- Ted - Data stewardship

- Metadata discovery of open data is a hot topic at the ESIP meeting

- Need to focus beyond discovery (possible strategic plan item)

- Ed - we still need practical examples and tools for data discovery - this is a relevant topic for users and provides

- Anna - discovery is not working

- Walt - ex. Require providers to give detailed metadata, which isn't happening

- How we store data is changing – ‘webification’ changes the game
- Ted – only ECHO is trying
- GSIC – Global Space based Inter-calibration System (<http://gsics.wmo.int/> [7])
- Find overlap between spatial and temporal satellite data for calibration
- Topics that we could incorporate into strategic plan
- Spatial search
- Webification
- Aggregation
- Walt – language describing what was applied to a “dataset” – metadata of what happened... this could also be a topic for the plan

### Actions:
