

## [Use and Reuse: Research Data Locally and Globally](#) [1]

Submitted by Krbm on Wed, 2014-01-08 09:52 Wednesday, January 8, 2014 - 09:30

**Event:** [Winter Meeting 2014](#) [2]

**Session Type:** [Plenary](#) [3]

**Notes:**

- need to be clever about what to keep and what to toss
- some organizations require the researcher to outline their data management
  - o the EPSRC (engineering physical science research council) requires the institution to develop and implement data management
  - o need to keep for 10 years after LAST USE
- studies have showing high rate of return of investment (this is not financial return)
- some government repositories are not as secure (ex. Canadian Science libraries) - but there are corporate organizations (like figshare)
  - o national responses - supporting universities (ex. DataONE)
- for data to be reusable, have to be able to find it
- available data increases the number of citations
- there are a lot of data centers - also repository finders
- data storage can be viewed like treasure
