

[RESTful Drupal Data Display Module using IDL/ENVI Service Engine hosted on a cloud](#) [1]

Submitted by Bcaron on Wed, 2014-06-04 15:17 **Event:** [Summer Meeting 2014](#) [2]

Abstract:

The NASA Science on Drupal Central Project has programmed a Drupal module that allows a Drupal web developer to display interactive data on a Drupal website. The module used the RESTful IDL/ENVI Service Engine hosted in a cloud to provide customizable data displays. The data variables are set using the standard Drupal module administrative page, allowing web developers with no IDL programming skills to customize the data display. This arrangement is optimal for agency and enterprise web content delivery.
