Event: [Telecon Minutes](#) [2]

Session Type: [Other](#) [3]

Collaboration Area: [Discovery](#) [4]

Abstract/Agenda:

Topic #1: DCP's

[\[edit\]](#) [5]**Topic #2: SPG RFC**

[\[edit\]](#) [6]**Topic #3: Winter meeting**

[\[edit\]](#) [7]**Topic #4: New business, anyone?**

Notes:

Topic #1: DCP's

- Update to DCP on versioning: ready for vote
- DCP on best practices: almost ready for vote
- DCP-8: close to being ready
- Plan to discuss DCP-8 and (hopefully) RFC DCP at the October telecon

[\[edit\]](#) [8]**Topic #2: SPG RFC (aka DCP 10)**

- Schedule for putting together RFC
- Soliciting co-authors...
- RFC will be discussed through DCP process
- Could be used to construct validators
- Should we have schema? schematron?

[\[edit\]](#) [9]**Topic #3: Winter meeting**

- Proposed: a brainstorming session early in week, planning session later in week. All in favor?
- BUT, not too early to start throwing ideas into the brainstorming pile
- Should tie it in with the Visioneers: grand challenges
 - E.g., satisfying the long tail
- Discuss in detail at November telecon

[\[edit\]](#) [10]**Topic #4: New business, anyone?**

- Earth Cube Broker Hack-a-thon (Christine)
 - Thanks to Discovery Cluster for loaning the Discovery Geoportal for the hack-a-thon
 - Hack-a-thon resulted in a number of enhancements - namely usability when registering resources, and how to carve up collections vs. granules (e.g., THREDDS, imagery, Census data)
 - Now, Discovery geoportal is available for continuing our investigation - workflows discussed at Summer Meeting
 - ATOM 1.0 validation has been implemented via xsd
 - Also - Discovery geoportal has out-of-the-box capabilities for creating metadata. Christine discussed with Products & Services Cluster the possibility of finding a home

for the application on the ESIP Portal site, so more ESIP members can have access to a metadata creation tool
