

[Cloud-Hosted Real-time Data Services for the Geosciences \(CHORDS\)](#)

[1]

Submitted by Daniels on Wed, 2015-07-01 15:22 **Event:** [Summer Meeting 2015](#) [2]

Abstract:

Cloud-Hosted Real-time Data Services for the Geosciences (CHORDS) is a real-time data services infrastructure that will provide an easy-to-use system to acquire, navigate and distribute real-time data streams via cloud services and the Internet. It will lower the barrier to these services for small instrument teams, employ data and metadata formats that adhere to community accepted standards, and broaden access to real-time data for the geosciences community. See full abstract [here](#) [3].
