

one picture post is worth a thousand pictures

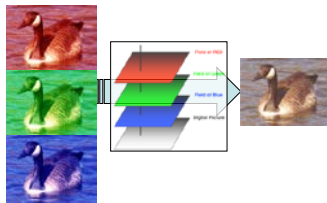

Take a walk. Bring your digital camera. Take nine pictures from a Picture Post and upload them to the Picture Post website. It is that easy to join the digital photography environmental science community and you will receive more than a thousand photographs in return!

Plants are like "green canaries"

Digital Images Contain 3 Colors

Digital Images Contain Pixels

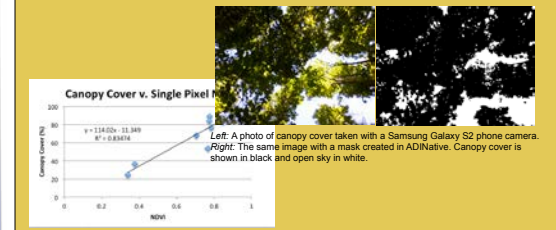

The Picture Post Network

Picture Post is an easy way to use your digital camera to take and share selected views of your local community with other citizens and community organizations around the world.

DEW Analyzing Digital Images Software

Measurements and Analysis

Monitor Invasive Species

DEW and Picture Post have been developed with support from NASA.
