

* Object Governance

2016 Winter ESIP

Point of Clarification

Agenda

- Identifying folks with an interest who will be attending the winter meeting and are involved in similar discussions in RDA, EarthCube, Force11 or other CNs and would be willing to give a brief update on that.
- Current practices, current limitations with those practices, what kinds of objects should be considered, etc.
- Continue the discussion on ESIP's role, potential collaboration between the collaborative network groups.
